

LaTeX vs Typst

A Modern Typesetting Comparison

What are they?

- LaTeX: Mature TeX-based typesetting system
 - Typst: Modern markup-based typesetting system
-

Key Differences

- LaTeX: old, powerful, complex
- Typst: new, simple, fast

- LaTeX: huge ecosystem
- Typst: growing ecosystem

—

LaTeX Advantages

- Extremely stable
- Widely used in academia
- Powerful packages (TikZ, BibTeX)
- Excellent for scientific publishing

—

LaTeX Disadvantages

- Steep learning curve
- Slow compilation
- Cryptic errors
- Complex syntax

—

Typst Advantages

- Very fast compilation
- Clean syntax (Markdown-like)
- Easy to learn
- Modern design

Typst Disadvantages

- Smaller ecosystem
- Less institutional adoption
- Still evolving

Conclusion

- LaTeX: best for academic publishing and legacy workflows
- Typst: best for modern, fast, and simple document creation
